About Me

I am a front-end developer with 5 years of software development experience.

Proficient in creating responsive and high-quality user interfaces for various business tasks by deploying React concepts. Always on the same page with designers and product owners to make best solutions.

Skilled in all stages of advanced web development - both frontend and backend.

Techstack

For front-end I mainly use React but I also have base knowledge of other modern front-end frameworks such as Angular and Vue.

Experienced with the React stack - Redux (prefer @redux-toolkit), react-router, styled-components and different UI kits - Ant Design, Material UI, Bootstrap. Also have a good knowledge of CSS and its pre-processors - SASS and SCSS.

Competent in Nest.js with Typeorm and PostgreSQL.

Portfolio

Education

Saint Petersburg State Electrotechnical University "LETI"

Bachelor's degree, Informatics and Computer Engineering, Sep 2015 - Jul 2019

Working History

Fullstack Developer - NVP Software LLC

Apr 2021 - Present

- Fullstack outsource development of different projects for Apple and Formelife
- Both frontend and backend for a highly-customizable CRM with third-party application integrations
- Frontend for a life activity tracking tool
- Successfully mentored 2 new teammates
- Maintain libraries of shared components including form builder/renderer engine
- Created a UI component library from scratch
- Designed API for shared components
- Created architecture for form builder/renderer engine (similar to Form.io) used by different teams in 4 projects

Frontend Developer - Developer Express, Inc.

Apr 2019 - Apr 2021

- Supported a library of Javascript cross-framework components
- Created different features (Drag and Drop, state management, editing and sorting enhancements) for components (DataGrid, PivotGrid, TreeList)
- Made the API of the components more React-like to make it usage in React more comfortable
- Feature full delivery cycle - from user request analysis to implementation and release support
- Activity in bug fixing - about 30% of team bug fixes
- Activity in process optimisation - created various internal tools to improve development processes
- Successfully mentored a new teammate
- Wrote a complete guide to internal systems to make onboarding processes easier
- Accessibility testing (WCAG 2.1, Section 508, EN 301 549)
- Designed multiple demo applications and wrote application code in React, Angular and Vue
- Communicate with customers in the support center and GitHub

QA Automation Engineer - Gaijin Entertainment

May 2018 - Apr 2019

- Build custom server test runner with Grafana integration
- Write tests for both backend (node.js + mocha) and frontend (selenium)
- Analyze PHP/Golang codebase of the SSO server
- Write documentation

Business Analyst Intern - Dnevnik.ru

Mar 2018 - May 2018

- Wrote documentation for school service which makes communication between teachers and students' parents easier
- Compared existing documentation with actual behavior
- Created BRDs for system
- Checked SQL queries for BRD compliance
